THE
VERSALINER®
SYSTEM

VERSALINER MP™

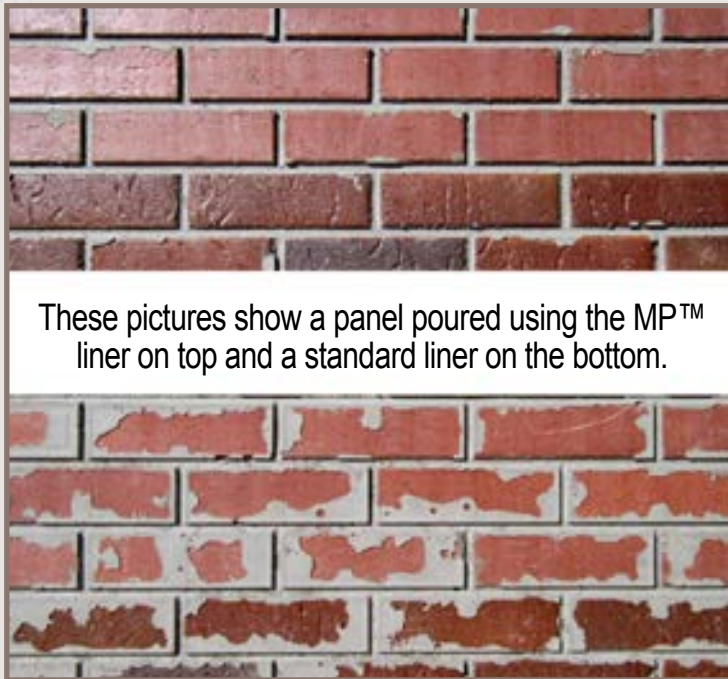

BENEFITS OF VERSALINER MP™

FOR EMBEDDING THIN BRICK IN CONCRETE PANELS

- LESS LEAKAGE
- LOWER LABOR COST
- LESS TIPPED BRICK
- QUICKER CLEAN UP
- BETTER FINISHED PRODUCT
- LESS SCRAPING

The MP Joint can account for as much as 75% savings in cleanup and patching costs

These pictures show a panel poured using the MP™ liner on top and a standard liner on the bottom.

Partially stripped, but not yet cleaned panel using Versaliner MP

Our newest innovation Versaliner MP™ provides the most cost effective approach to embedding thin brick in concrete wall panels including structural walls, high performance insulated wall panels, spandrel panels and columns.

Versaliner MP™ better accommodates varying sizes and imperfections found in many brick production runs, creating a better finished wall.
